comprehensive
market snapshot

- **Primary Market:**
Greater Seattle Area
- **Coverage:** King
County residential
properties

21,597 residential
property listings

Hypothesis

01

Hypothesis 1

Houses in the city cost more than the suburbs

02

Hypothesis 2

Bigger the house, more expensive it is

03

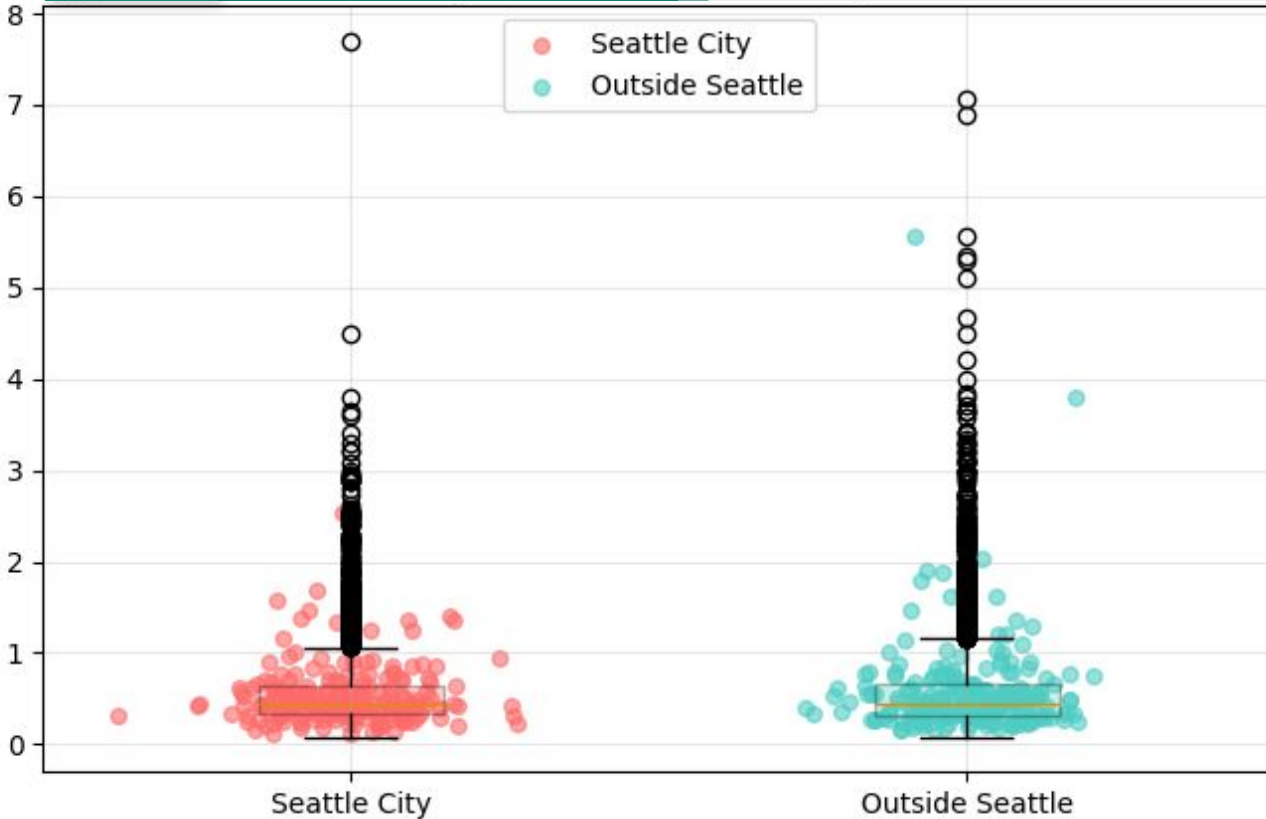

Hypothesis 3

The house sales are not season dependent

01

Hypothesis 1

Houses in the city cost more than the suburbs

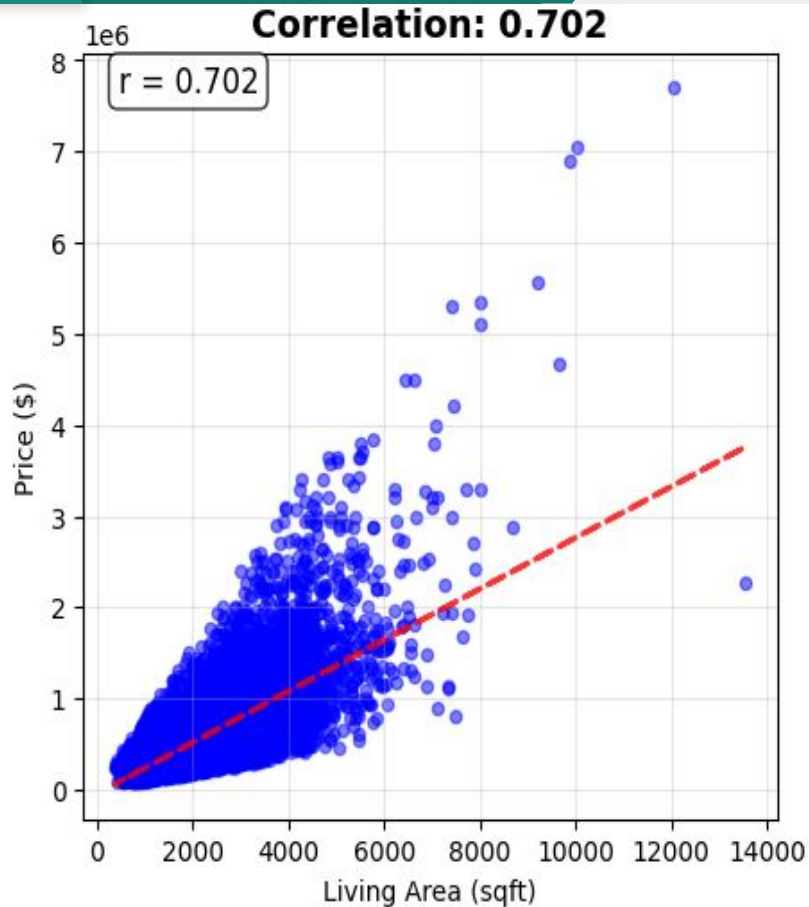

- Outside Seattle houses are **\$8,915** MORE expensive
- Seattle City houses are **1.02x** cheaper

02

Hypothesis 2

Bigger the house, more expensive it is

The correlation is STATISTICALLY SIGNIFICANT

Higher the area, more the price

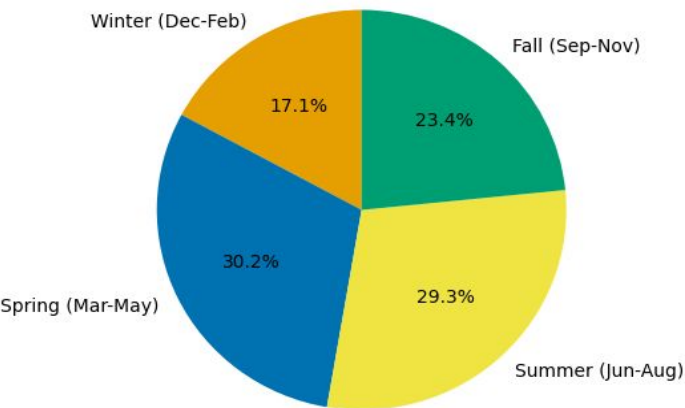

03

Hypothesis 3

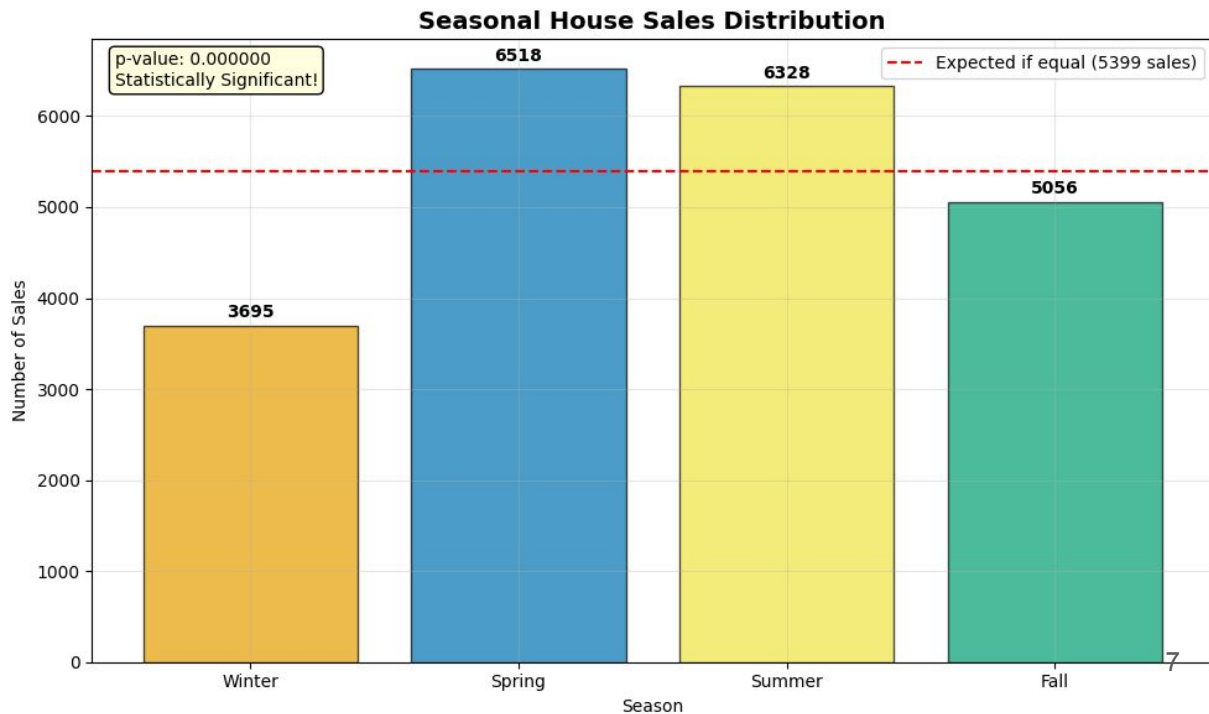

The house sales are not season dependent

Sales by Season

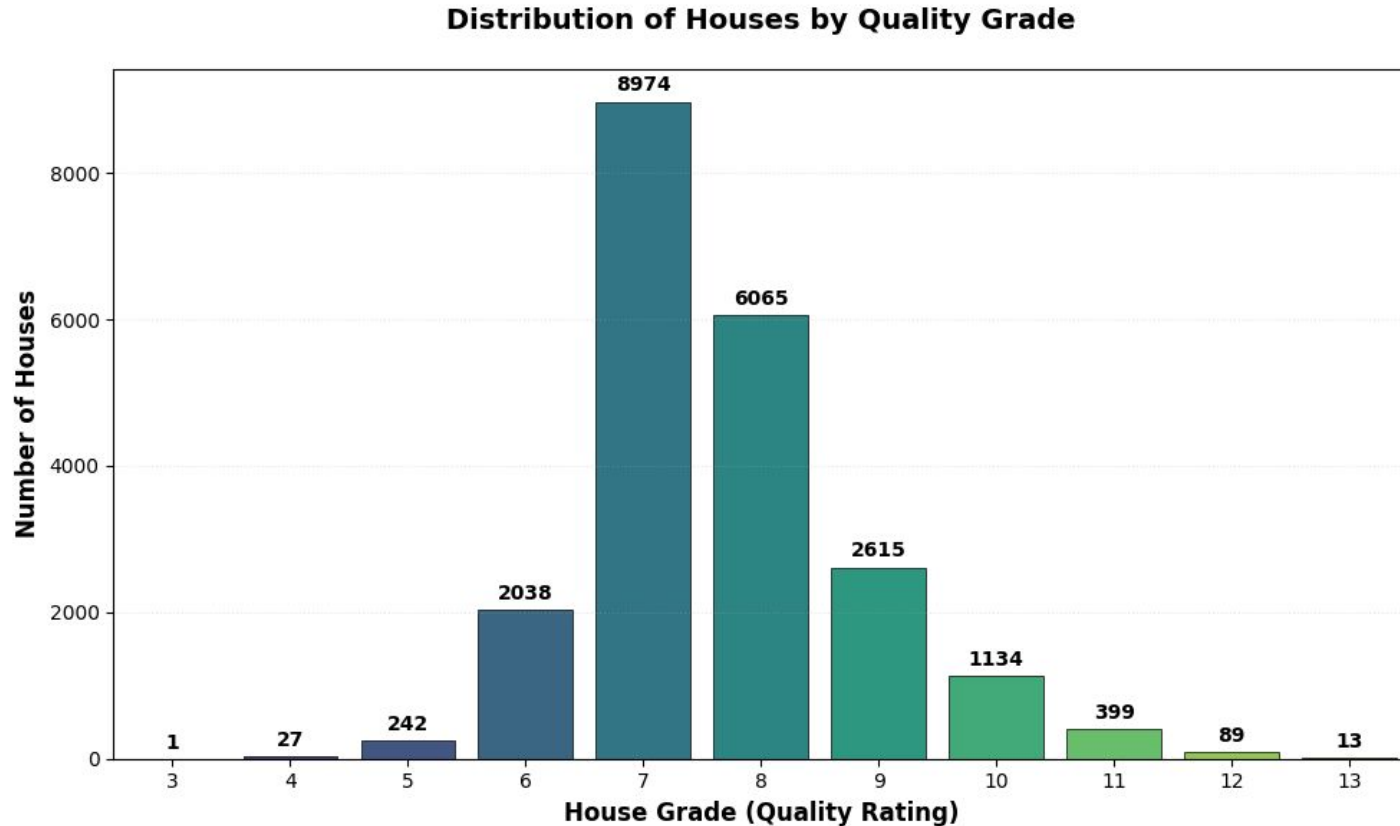

House sale is significantly season dependent,

Spring has **2,823** more sales than Winter

That's **1.8x** more sales in Spring!
